****NOTE**** All TV brands program differently. Most will allow you to simply type in the channel number of the “RF Channel” in the list above for the channel you are wanting.. After the TV sets on that carrier for a few seconds the TV should load the channel maps for the channel you are wanting. Some TV’s will add the channels at this point automatically to the channel memory. Others will require that you add those channels into memory manually. Please refer to the Owners Manual for detailed instructions for your television.

If you have any questions, please call and we will be glad to help.
